

BOAT'S COIN

**The Future of Decentralized
Yacht Charter, Boat Leasing, and all Marine Services**

Version 3.0 | April 18, 2018

© Boats Coin Group Inc.

ABSTRACT

Leading software platforms for pushing the boundaries of the worldwide nautical industry.

We've combined the best of traditional and cryptocurrency worlds.

Robust multiple independent Boat's Coin software solutions that decentralize yacht charter, boat leasing, and all marine services in traditional and cryptocurrency way:

1. Boat's Coin EUR (BCE) cryptocurrency solve:

- Marine transaction valuations and easier handling of marine products, services, and corporate values through cryptocurrency sponsorship type of smart contracts that represents a fraction of the virtual value.
- Stability and quality, because BCE is cryptocurrency backed in 100% ratio with boats as tangible assets, giving guaranteed 10-12% annual rewards and 1:1 fixed stability against EUR fiat currency.

2. Innovative Boat's Coin decentralized yacht charter and boat leasing investment platform developed in a traditional way without blockchain solutions (minimum viable product MVP is already developed).

Note: Any buying, selling, holding, or transferring a cryptocurrency is a legal and potentially taxable event. Everyone is responsible for understanding his country of residence cryptocurrency regulations before using any cryptocurrency.

1. INTRODUCTION

We are all aware that there exists broad palette of assets that people choose as traditional ways to store material values in the world.

Boat's Coin development team believe that connecting directly or indirectly blockchain technology with these "traditional" assets is a better solution for volatility stabilizing, transacting, accounting and storing for these assets.

A lot of crypto community members in the world and mainstream media report disadvantages most of the existing cryptocurrencies currently as reasons listed here: too extreme volatility, "bubble waiting to burst," nothing real behind the cryptocurrencies, too risky investment types and similar.

The idea of asset-backed cryptocurrencies are not so new at all but is not well developed.

In this whitepaper, we focus on presenting you more than just one ICO.

You will get full overviews of the Boat's Coin robust multiple independent Boat's Coin software solutions that decentralize yacht charter, boat leasing, and all marine services.

This will help you to understand easily, estimate and evaluate Boat's Coin software development company.

You will understand how our innovative Boat's Coin marine industry, yacht charter, and boat leasing investing platform works on both levels:

1. A traditional way without blockchain solution
2. Cryptocurrency blockchain way that fully revolutionizes the marine industry starting from the transactions level, over new investment approach possibility, till opening marine industry savings possibilities to any worldwide citizen.

2. WHITEPAPER AND ICO STRUCTURE

This whitepaper will follow you through our innovative cryptocurrency technologies in a natural way.

Boat's Coin traditional technology will be explained first and then will follow Boat's Coin EUR (BCE) technology.

The important thing is to notice traditional technology solution will on own example show fundamentals (how the core of technology solution works) and on top of those fundamentals we are implementing more advanced blockchain solution.

And because of that, it is possible for Boat's Coin platform outside of cryptocurrency market too (work with a limited level of features), and **this makes additional stability in the whole project overall.**

Review the graphic representations of Whitepaper and ICO structure listed below.

3. YACHT CHARTER

INDUSTRY PROBLEM AND

OUR SOLUTION

Boat's Coin decentralized yacht charter and boat investing platform minimum viable product (MVP) is developed.

Our MVP is visible through access to our yacht charter web-based investment control panel. Videos of all inbuilt functions for admin panel is here https://youtu.be/O1fwMw_ySjE, and regular users control panel video can be found here <https://youtu.be/6y-mTVeAIEY>.

We are building Boat's Coin project with our funds, time and effort. We have the minimal visible product already! We are not looking for investors to build the core of our idea from scratch, and risk and wait for it to happen.

Yacht Charter Management Understanding

Whenever your previous level of knowledge in these areas of business is, here, we will in a simple and clear way explain broader background business environment.

Yacht charter management is a corporate connection between the charter company and the owner of the boat, in which the charter organization lease out the boat, handles the marketing and repairs of the boat and shares the profit with the owner of the boat.

The yacht charter management business (30-60 feet or 10-20 meter boats) on above way has successfully made businesses in the last decades worldwide.

THE PROBLEM: Usually is just one person the owner of the boat! This type of business requires high investment from the owner, even in boat loan cases, a boat owner must make a high down payment.

OUR SOLUTION: We built a platform that makes it possible for everyone to access and profit from yacht charter financing. You can earn interest and invest in yacht charter management by using **Boat's Coin traditional API platform starting from 1000 EUR.** And if you wish to use **Boat's Coin cryptocurrency**, then **you have not any minimal investment limit at all**, and you can gain one step higher interest rates than using traditional way.

GUARANTEED INTEREST RATES: Yacht charter management boat investors get a **5% annual guaranteed** return through Boat's Coin traditional investment platform.

Yacht charter management boat investors get a **10-12% annual guaranteed** return through BCE cryptocurrency investment platform.

Better yacht charter management software background understanding

The worldwide yacht charter management business (30-60 feet or 10-20 meter boats) in today environment happen in such a way that the main market share (around 60%) go through API yacht charter management software.

What is API yacht charter management software?

The API yacht charter management software is a robust and custom programming solution that makes it possible for one database (the company who owns the API system) to be loaded with yacht charter deals into hundreds of other websites.

It creates higher quality yacht charter sales services because all sides start to be in a win-win situation.

- Boat owner receives yacht bookings instantly without thinking and investing a lot to find the clients.
- Lots of charter agencies worldwide after initial installation literally must do nothing special. Their website through API yacht charter management software instantly loads all yacht charter offers. They can answer client emails and promote their website, and that's all.
- The API yacht charter management software company is in a win-win situation because they offer a platform through which multiple people rent boats, and they control a large part of yacht charter market, but they don't have any boat ownership.

EXAMPLE: If you search Google for “yacht charter” keyword right now over 60% of all websites you find have NOT owned boats at all. **Their yacht charter offer on their websites is NOT their boats.** They load data in their websites using API background calls. It's yachts charter management software from few companies that have control over whole yacht charter industry in that way.

So, where is Boat's Coin place in all this?

From the start, we are pretty aware that yacht charter market is already shared and crowded. Invest money and time to build one identical system and the increase in the currency will not give anyone any extra profit.

However, we perceive that this model works successfully last decade in yacht charter industry.

Our target was that we REDEFINE yacht charter industry in a more in-depth level using their name in a successfully tested approach but through BOAT OWNERSHIP LEVEL.

How does Boat's Coin yacht charter management investing API platform works?

We must be aware that most of the boats available for yacht charter are boats that bank gives the boat on leasing or loan way.

And the usual requirement for these leasing and loan deals are the high deposit. So yacht charter company usually deposit from 40.000 EUR and more for the new boat, and for the rest, the amount gets leasing or loan.

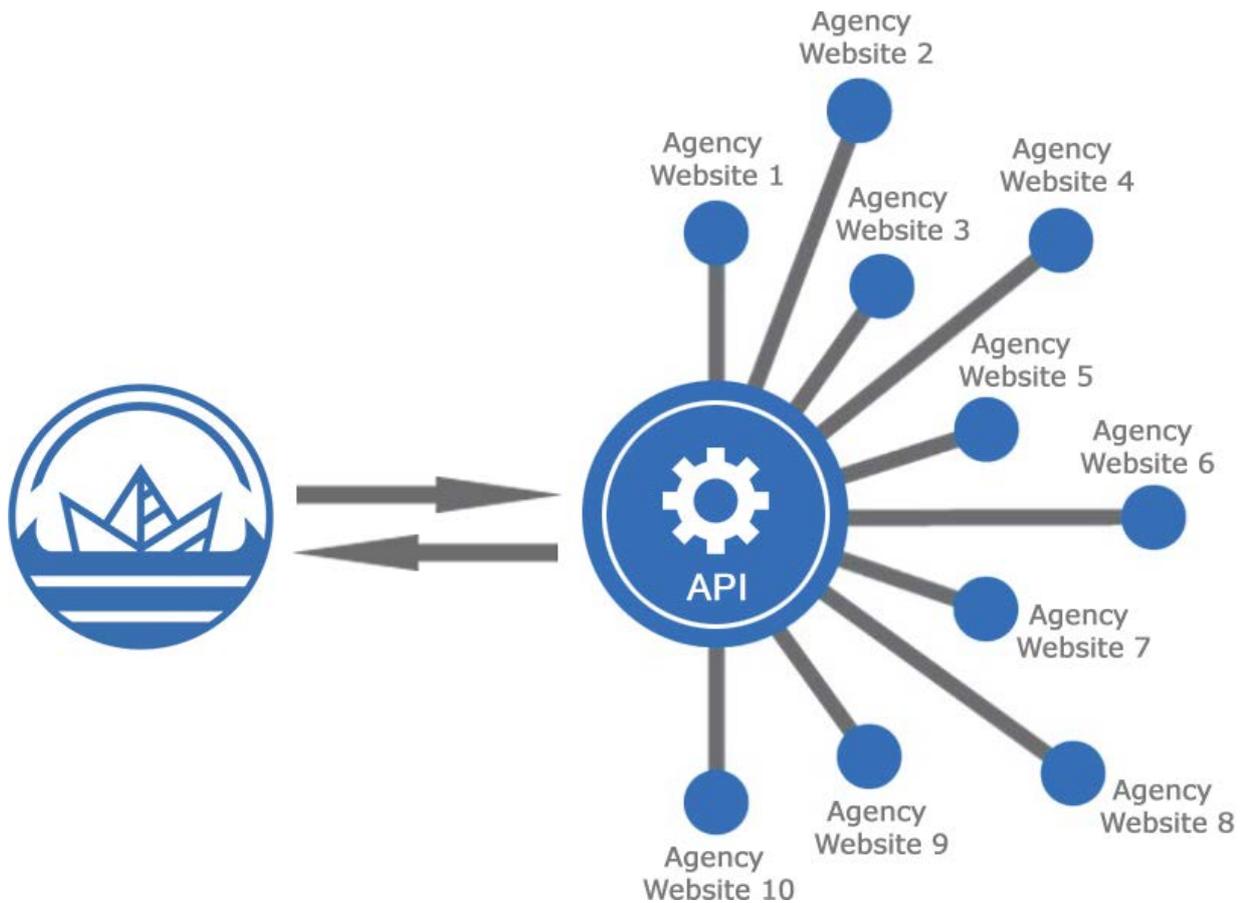

We can see that most significant problem here is high initial investment requirement.

Boat's Coin yacht charter management investing API platform is the first in history to change and improve that.

The system works in the same way as other yacht charter management API software.

All other agencies load data from Boat's Coin main database and offer Boat's Coin boat investment services to end users!

Visualization of our programmed APIs workflow:

Especially in today's environment when global savings interest rates are 1.25% per year, people can use Boat's Coin yacht charter management investing API platform for their investment and get 5% per year guaranteed interest rates. It is close to 5 times more than savings in the bank.

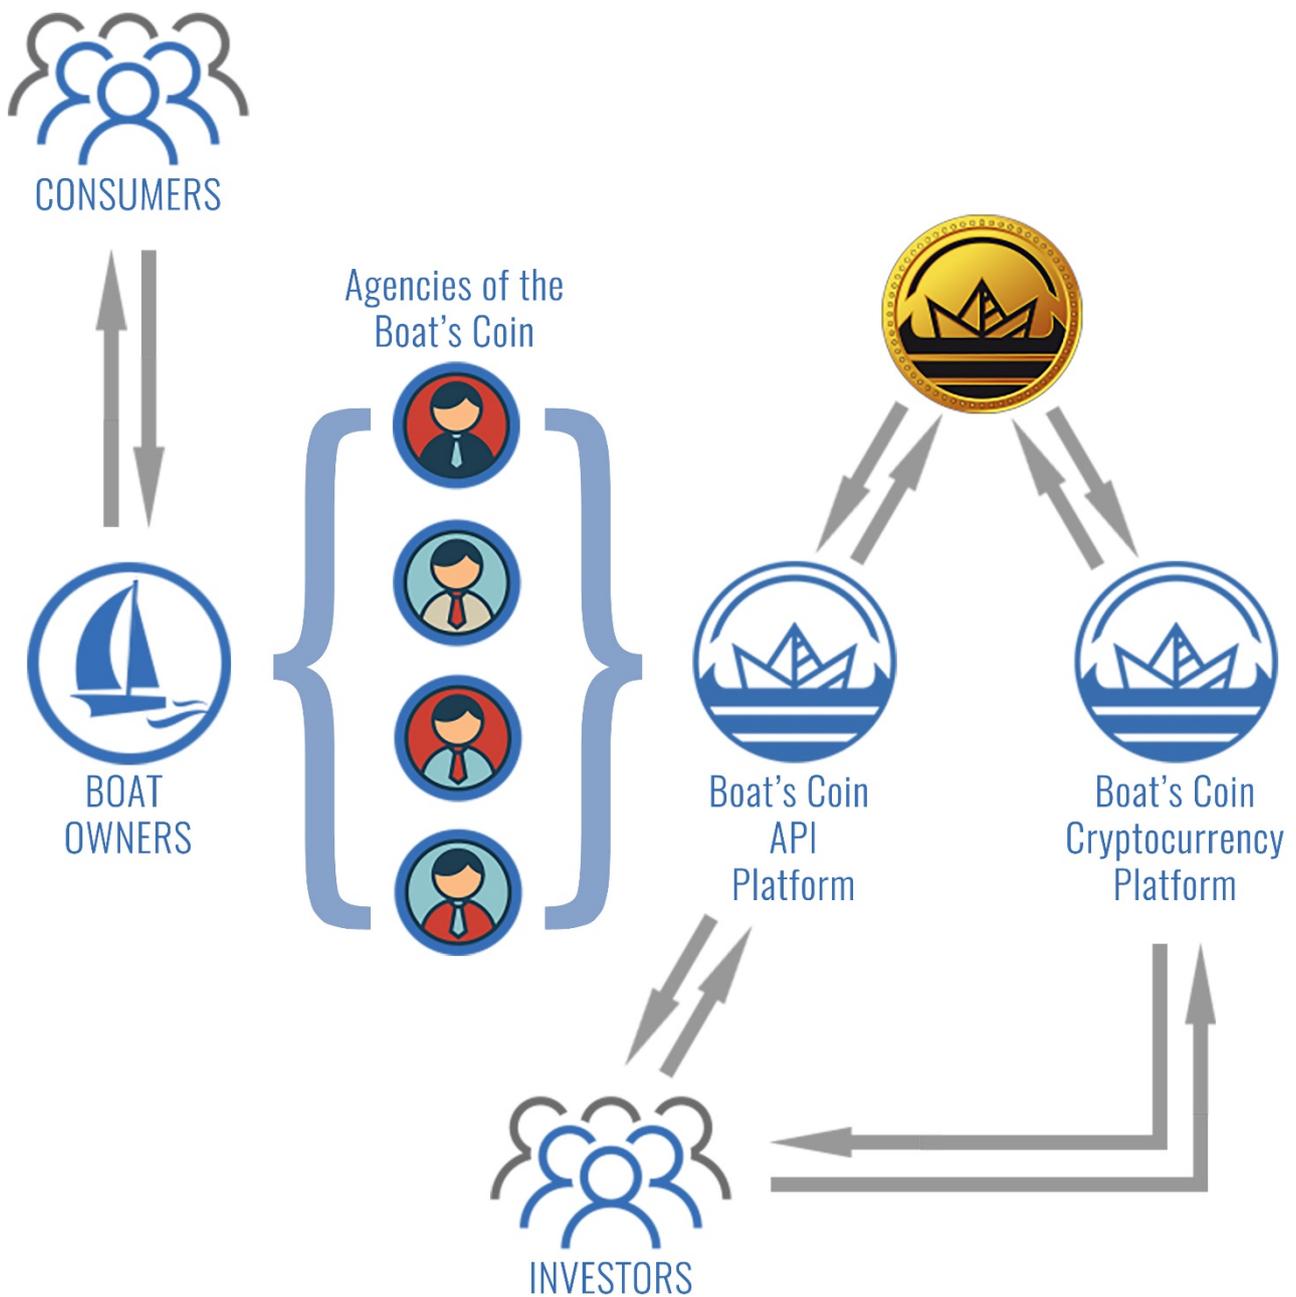

4. BOAT'S COIN CRYPTOCURRENCY BACKGROUND UNDERSTANDING

We have explained above that yacht charter management investing API platform is enough to innovative and provide a quality solution to our usual investors with good value.

However, our plan goes deeper and fully revolutionize on yacht charter management investing business, and **we are ready to connect Boat's Coin to the cryptocurrency market and build our BCE crypto coin now.**

This move opens a fully new level of business possibilities that never existed before in yacht charter management business.

THE IMAGE BELOW GIVES YOU A FULL VISUAL OVERVIEW OF THE COMPLETE SYSTEM (TRADITIONAL API AND BCE CRYPTOCURRENCY TECHNOLOGY PART):

As you can see in the above image, our software is a **double independent platform**.

“Traditional” Boat’s Coin API Platform part can work independently from cryptocurrency platform part. This approach radically increases the stability of our project, as Boat's Coin can do business through traditional part (with different business terms than cryptocurrency part) even in" worst scenario case" that whole cryptocurrency market exchanges stop working somehow and our Boat's Coin cryptocurrency with them. **Investors who**

understand this can get more trust in BCE by itself, just because of project structure before all.

You can see how this project covers all type of investors now, from traditional one till modern cryptocurrency investors.

All Risks are Managed for Investors Easily

All-risk boat insurance (CASCO) from damages covers every boat inside our yacht fleet. Also, there's insurance for the cost of minimizing damage when an accident has already occurred and during the boat save attempt. Any potential boat investor risks are covered in this way, with wide insurance policy terms. This all makes Boat's Coin, the safest low-risk investment way.

CONCLUSION: Boat's Coin corporation focus on controlling yacht charter industry on the deepest level possible, from boat ownership and boat financing level. This makes it possible for us to have interest rates from many boats in yacht charter industry worldwide.

Controlling nautical industry like that from fundamental boats assets ownership level is a huge potential and excellent stability startup point to build more features on top of these fundamentals.

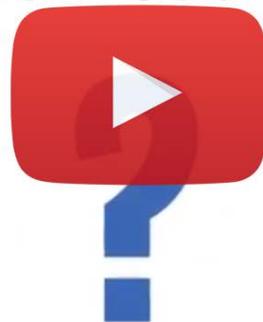

5. BOAT'S COIN EUR (BCE)

TECHNOLOGY

Boat's Coin's "the true cryptocurrency" mission: We are focused on the development of cryptocurrencies connected with the tangible asset.

Quick Video Overview: [How Boat's Coin Works?](#)

How Boat's Coin Guaranteed Works

BCE Technical Details

Name of Token: **Boat's Coin EUR**

Symbol: BCE

Standard: ERC20

Decimals: 8

Role of Token: Security Token

Use of Token: Boat's Coin EUR (BCE) is backed in 100% with boats as tangible assets, give you guaranteed annual rewards and 1:1 stability against fiat currency.

Emission: Emission of tokens is 100% equal to tangible boat asset value that is added to the system.

Total supply: Total supply is not limited theoretically. The number of available boats and decentralized cryptocurrency market demand limits supply on the natural way.

Value: 1 BCE = 1 EUR

BCE Source: <https://github.com/boatscoin>

BCE Features

The main BCE features are:

1. Boat's Coin EUR is centralized cryptocurrency backed 100% with boats as tangible assets.
2. BCE through SAFT (simple agreement for future tokens) as a default guarantee 10-12% per year rewards as defined in a smart contract.
3. BCE is fixed connected to EUR: 1 EUR = 1 BCE as default.
4. BCE is a security token represents a tradable sponsorship type of relations.

5. BCE is making easier any kind of marine industry buy and sale relations.
6. The similarity to traditional stocks (but free of any administration) makes possible the fractional blockchain valuation of any product or service.

BCE Architecture

Boat's Coin technology is 2-layers architecture.

The first layer is fundamental structure 100% backed by boats as tangible assets and the second layer are the transactional part that makes easier handling and payments of marine products, services, and corporate values through cryptocurrency sponsorship type of smart contracts that represents a fraction of the virtual value.

```
graph TD; A[Fundamental Structure] --> B[Transactional Functions]
```

Fundamental Structure

Transactional Functions

We love saying, that we are one unique cryptocurrency with two layers architecture for your success.

How does BCE Fundamental Structure Works?

We start buying a new boat of 300.000 EUR value, and at the same time, we are announcing in public new BCE blockchain node creation in 300.000 EUR value too.

Everyone can buy piece of that one BCE blockchain through cryptocurrency exchanges and get next seven years 10-12% per year guaranteed rewards paid in BCE.

If you want to sell your BCE more early to anyone, you can do it and still keep part of the smart contract that contains rewards only, or you can sell your complete BCE smart contract including rewards to anyone before expiration.

The values of boats are pretty stable similar to real estate, but after a period of 7 years' value drops down one significant step. Because that reason, Boats' Coin continually maintenance new boats in the system through 7 years' boat replacement cycle.

After seven years or earlier, Boat's Coin close that one BCE blockchain node, sell the boat connected to this node and opens a new one for the new boat.

Flow of Funds

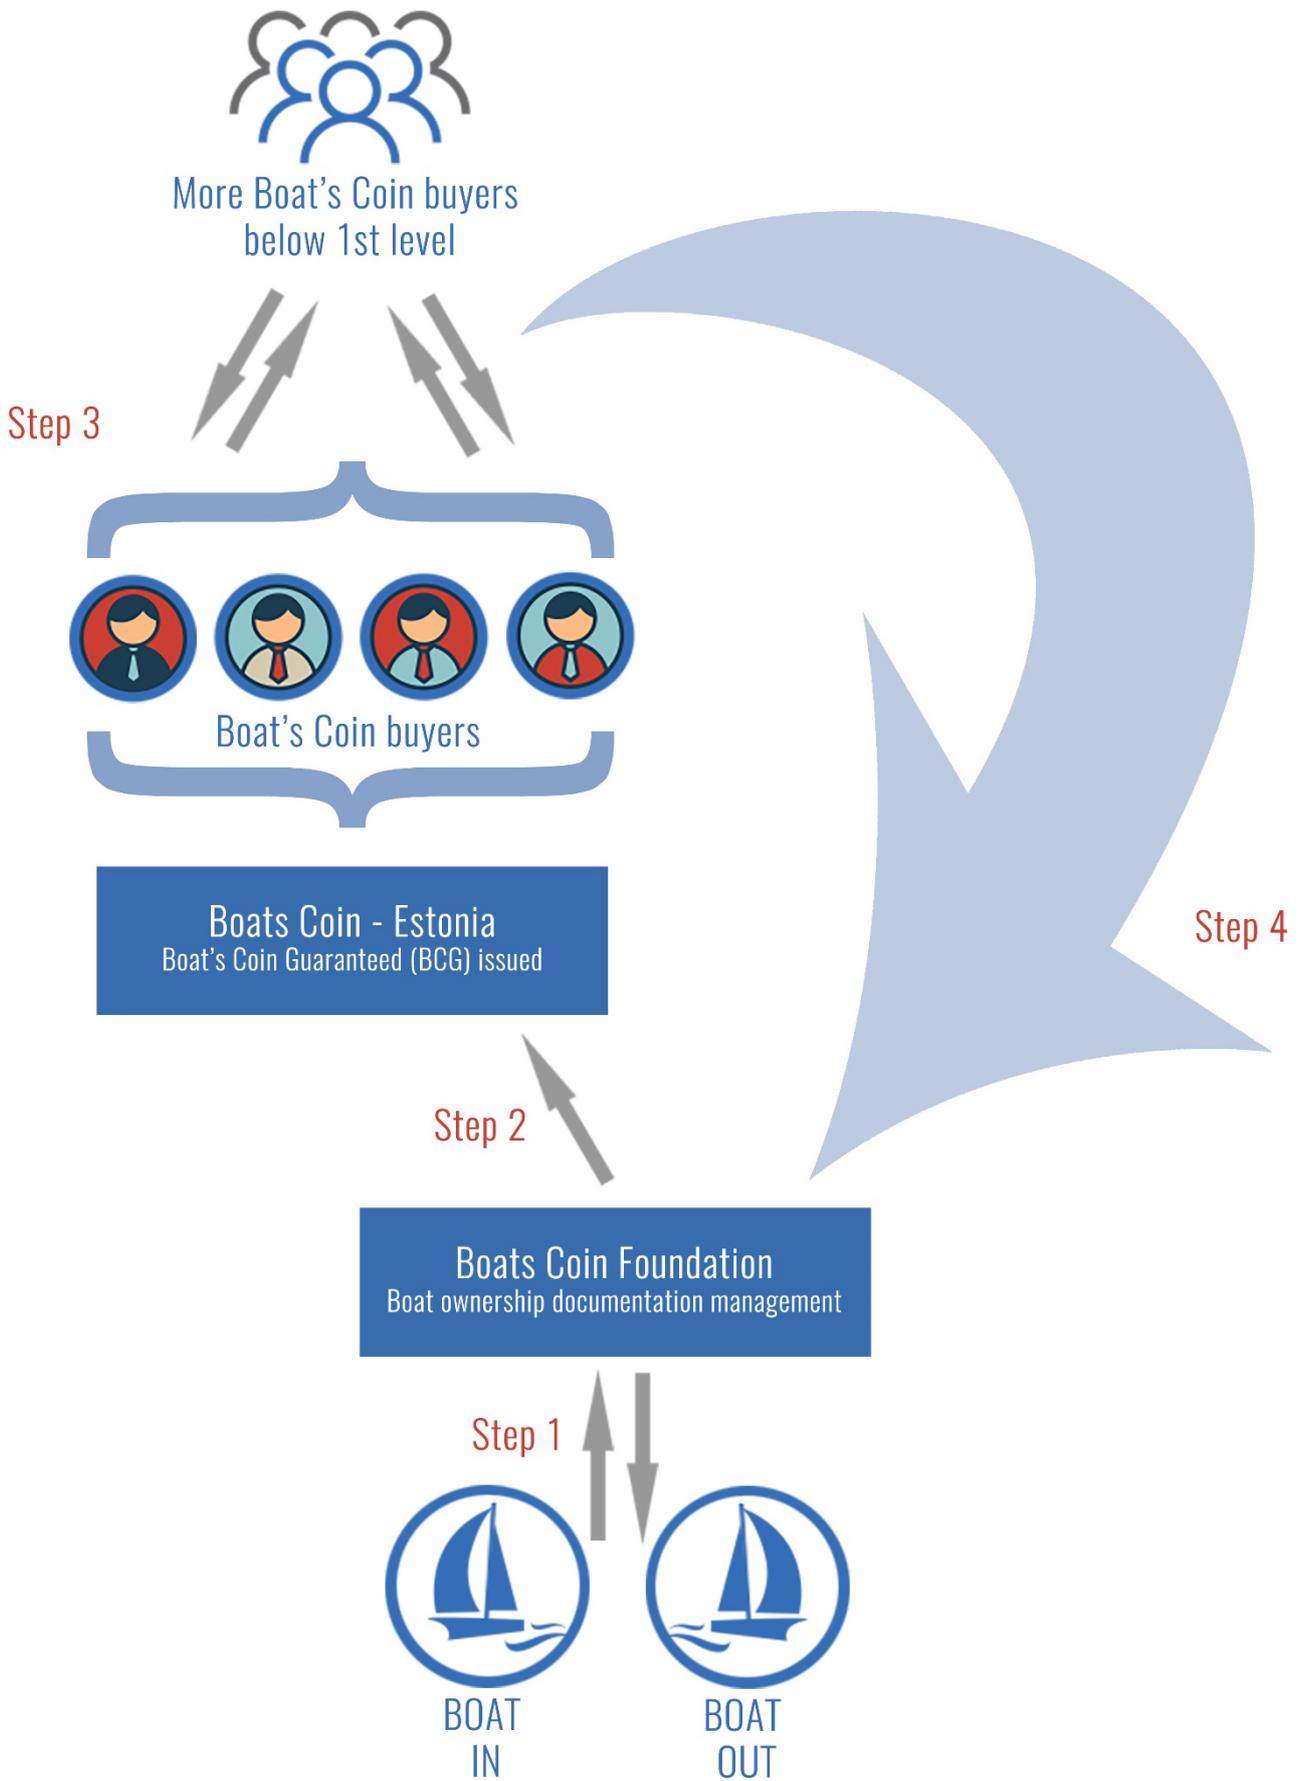

Step 1: Boat's Coin get proforma invoice about the exact boat and prepare all required cost estimations for 7 years' investment cycle (CASCO full boat insurance offer, boat maintenance costs and boat mooring costs). The correct final value in fiat EUR currency and the unique number of the future blockchain node package is defined now.

Step 2: Boat's Coin issue correct blockchain node in exact 100% same fiat EUR value as was defined by blockchain node package in the last step.

Step 3: The users can buy 7 years smart-contract with 10-12% guaranteed rewards annual rate paid in BCE's. The user can hold whole cycle BCE or can resell or exchange entire contract with yearly reward included or can just keep yearly reward rate and sell pure BCE without annual reward part.

Step 4: Boat's Coin destroys the expired BCE's and re-issue new BCE's based on new boats added to the 7 years' cycle.

THE IMAGE BELOW GIVES YOU A FULL VISUAL OVERVIEW OF THE BOAT'S COIN FLOW OF FUNDS:

Proof of Reserves and Real-Time Transparency

Proof of reserves and real-time transparency are radically crucial in the cryptocurrency industry.

Boat's Coin maintenance real-time transparency from first till final moment of BCE lifetime cycle:

1. The process was starting with official pro-forma invoices about the exact boat, through in advance announcing the unique number and value of the blockchain note that will be issued in 100% same amount value as the boat that will be purchased.
2. After blockchain node is sold, Boat's Coin buys the boat and on own webpages again publish final boat invoice, scanned boat documents (after boat get a flag), and port address where primary boat stay.
3. All boat ownership documents stay published on the Boat's Coin Transparency Page till the moment when system end duration of that blockchain note.

Note: First boat in the system is bought with part of money fundraised with this ICO process. **On that way from the first-moment system start with in advance reserved 100% tangible backed boat asset.**

Adding new boats and creating equivalent blockchain value process

To fully understand processes of adding new boats and creating equivalent new blockchain value process and understand the fundamentals of Boat's Coin real-time transparency, person must be aware **how new boats are available for buying from boat building factories worldwide.**

New boats 10-20 meters in size are in over than 98% of cases not available to be bought “right now.” Right now are usually available only boats that are used on the boat shows as a sample model and sample models is radically hard to buy.

Every boat factory has own boat production list that gives to boat buyers. Usual waiting time for new boat delivery is 12 months. For some super popular models more than this.

Understanding this new boat order process, you are aware that any boat from Boat's Coin side can't be bought immediately. We do best efforts to share and open new blockchains based on expected boat factory delivery dates.

In cases when by any reason boat delivery is in delay, Boat's Coin still stick to planned dates, and **we pay interest rates as planned at our own expense and from the cost of our company.**

If radical case happens and the factory cannot deliver the boat in planned time window at all, Boat's Coin buys **most possible new used boat on the market** in cases like that.

Example: As an example, our first bought boat in the blockchain system must be most possible new used boat, because to start first 7 years cycle boat must be available immediately at right moment.

Understanding the Boat Package and the Boat Value as a Tangible Asset

Boat package represents a tangible assets value that Boat's Coin put behind BCE cryptocurrency. Boats Coin Foundation during 7 years cycle periods uses boats in yacht charter rental business, boat leasing finance, and manage other suitable services to be able giving guaranteed annual rewards.

The boat package

The boat package is the total sum of these costs: boat buying price, boat tax, 7 years of mooring, insurance and maintenance costs. Boat package total amount is always different for every new boat and depends on actual local tax, morning, insurance and maintenance costs, but as some general estimation, the boat package is always 2x higher or more than just purchase buying cost of the boat itself.

The boat value as a tangible asset

A six-year-old yacht in good condition is worth 55 to 60% of new value. Because of that Boat's Coin Foundation manage 7 years cycles and continuously sell old and buy new boats.

As we can see, when Boat's Coin start with the new boat in a 7 years cycle, the boat package has more than 200% higher value than purchase cost of the boat itself.

Counting "overall" through 7 years cycle including losing the usual market value of every boat, the Boat's Coin EUR (BCE) is **on average** backed in 100% with boat value as tangible assets.

BCE Guaranteed Annual Rewards Overview

BCE locked savings <30.000 EUR has 10% guaranteed annual reward (paid monthly in BCE)

BCE locked savings <300.000 EUR has 11% guaranteed annual reward (paid monthly in BCE)

BCE locked savings 300.000 EUR, and >300.000 EUR has 12% guaranteed annual reward (paid monthly in BCE)

How does BCE Transactional Functions Works?

Let's shorten the theory and directly connect you to the transactional benefits.

We are explaining all through simple real-life "use cases" below. It will give you an instant idea about practical use and lot possible variations of the method used as an example.

Just click any "use case" link below and understand the benefits of Boat's Coin transactional technology.

If you wish to get these benefits, just take one step further to our website and signup.

You must not be pre-ICO or ICO investor at all to get these benefits and use these features.

Everyone can quickly get the benefits of Boat's Coin technology.

INDIVIDUALS:

Use Case 1: [I wish to buy easier and cheaper marine products, services and subscriptions](#)

Use Case 2: [I want to buy easier and cheaper new or used boat](#)

Use Case 3: [I want to rent boat easier and cheaper](#)

Use Case 4: [I wish to sell my boat more easily](#)

Use Case 5: [I want to rent a boat from yacht charter company without required yacht charter refundable deposit complications](#)

Use Case 6: [I want to buy more safe product or service from unknown persons](#)

PLATFORM FOR OTHER CRYPTOCURRENCIES:

Use Case 7: [I wish to transfer other cryptocurrencies without exchange directly into Boat's Coin](#)

Use Case 8: [We have own cryptocurrency and looking for implementation into Boat's Coin OMNI wallet](#)

WEBSITES & COMPANIES:

Use Case 9: [I want to start my own nautical industry investing system with your agency](#)

Use Case 10: [I want people to easier buy or get discounts on my marine products](#)

Use Case 11: [I am a boat sale company owner, and I wish that people can buy boats easily and cheaper from my website](#)

Use Case 12: [I am a yacht charter company owner and want to rent boats to people more affordable and easier](#)

Use Case 13: [I want my yacht charter company can rent boats without required yacht charter refundable deposit complications](#)

Use Case 14: [I wish that my company easily sell products or services to unknown persons](#)

INDIVIDUALS:

Use Case 1: I wish to buy easier and cheaper marine products, services and subscriptions

It is easy; Boat's Coin constantly work to make deals with new marine industry companies and this open market for easier and often cheaper buying of marine products, services and subscriptions. If the web store you visit still doesn't support BCE, ask them about it and if possible send them your invitation link that they should begin to accept BCE. You can receive rewards commission in BCE from all stores that you successfully invite too.

Take care, even price of marine product, service or subscription is same as regular sale price, if you make savings deal with BCE you can get 10-12% annual reward, and this approach itself make any transaction cheaper from the first place.

Through BCE, you can get cheaper and easier marine or any other products and services you need worldwide.

§

Use Case 2: I want to buy easier and cheaper new or used boat

It is one step larger operation because boats are not usually cheap, but anyway, BCE just offers more possibilities then classic fiat currency, and this makes itself easier to realize so large transactions.

If people or company who sell the boat still doesn't support BCE, just inform them about this possibility and if possible send to boat seller your invitation link that they begin to accept BCE. You can receive the commission in BCE from all people and boat sale companies than you successfully invite too.

If you make savings deal with BCE, you can get 10-12% annual reward. This approach makes boat buying cheaper because if your buyer accepts payment in BCE, you have the option to use your BCE in the transaction, but still keep 10-12% reward based on your 7 years deal that you make in the past. This approach makes larger savings possibilities because boats usually have high cost.

Boat's Coin constantly works to make deals with boat builders so if it is a new boat in the case in these cases can happen special discount on top of the usual price.

Boat's Coin after 7 years cycle usually sell own used boats on the market, in case of used boats from time to time this is good buying possibility for the used boat too.

You can through BCE mining get easier and cheaper new and used boats.

§

Use Case 3: I want to rent boat easier and cheaper

It is easy; Boat's Coin constantly works to make deals with yacht charter companies and this open market for easier and often cheaper boat rental prices. Additionally, Boat's Coin uses own boats in yacht charter industry, and if our own boats are available, additional discounts are possible. If your yacht charter company still doesn't support BCE, ask them about that and if possible send them your invitation link that they start to accept BCE. You can receive rewards commission in BCE from all yacht charter companies than you successfully invite too.

You can through BCE get easier and cheaper boat rental and yacht charter.

§

Use Case 4: I wish to sell my boat more easily

A boat owner knows that any boat is not easy to sell. If you accept BCE as part or full value of your boat, your boat sale will easier happen because BCE cryptocurrency offers more possible combinations for your boat buyer then it offers real fiat currency. Just inform people through a website where you sell your boat about the option that you accept. You can exchange amount of BCE that buyer has against boat you sell and trade BCE latter to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

This approach makes your boat offer radically more popular and make it easier to sell on a worldwide base because if you accept BCE, it has similar effects like you give a hidden discount 10-12%! If your buyer makes a previous saving in BCE, he or she has the option to use BCE in the transaction, but still, keep 10-12% reward based on 7 years deal that that person makes in the past with Boat's Coin.

If people who are interested in buying your boat still doesn't have BCE, ask them about that and if possible send them your invitation link that they start to trade with BCE. You can receive rewards in BCE from all people that you successfully invited too.

You radically make your boat sale more attractive and cheaper for people worldwide.

Your boat buyer can through BCE get more affordable your used boat, and you can easily exchange BCE to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

§

Use Case 5: I want to rent a boat from yacht charter company without required yacht charter refundable deposit complications

When you rent the boat from yacht charter companies, yacht charter deposit is usually required. It covers all possible damage to the yacht during your charter. Damage deposits range depending on the age and value of the boat. They start at around €1,500 and can be as much as €10,000 for the more expensive bareboat charter yachts.

BSC have timer delay options that can help with any escrow type of situation. So you can just give the charter company your BCE and set 7 days delay. If you are back from bare yacht charter with the whole boat, the system automatically sends your BCE back. If any damage to the boat happens, a system will release your damage deposit reserved BCE to a charter company.

You easily avoid any complications with credit card companies and other issues with the traditional bareboat charter administration.

You can use advanced BCE delay escrow features and make your bareboat charter orders more modern, direct and straightforward.

§

Use Case 6: I want to buy more safe product or service from unknown persons

If you want to buy any products and services from unknown person BSC can help you do it more safely.

BSC have timer delay options that can help with any escrow type of situation. So you can just set the delay time in your BCE transaction, and the seller sends you product or service. After you receive product or service successfully, BCE is given to the seller. If any problem with delivery happens, you can return the product or service to the seller and get your BCE funds back. Or if you want, an escrow agent can be readily added to the transaction as independent negotiation 3rd party site.

Additional one advanced BCE crypto value option is a messaging system. If you use BCE messaging option, you can make your cryptocurrency transactions more manageable, because this type of operation is not happening in just one and immediate step. If you need and wish, you can make complex deals, create a safe way for both sides buyer and seller.

You can do any transactions with unknown people in a radically safe way by using BCE advanced features.

ADVANCED CRYPTOCURRENCY TRANSACTIONS FOR EVERYONE:

Use Case 7: I wish to transfer other cryptocurrencies without exchange directly into Boat's Coin

The BCE natively supports multiple wallets creation for all BTC derived blockchains and a few other RPC API. It also has support for HTTP API to power the wallet, e.g., blockcypher.com, blockchain.info, and blocktrail.com. Other API can be easily integrated. All wallets can be used as a payment gateway.

Take care, rare exist stable and quality cryptocurrencies like BCE that can have 1:1 ratio against fiat money. **If you buy some volatile cryptocurrency that went up and now go down, BCE is “safe haven” for you to EXIT these high risky transactions.** When you buy BCE you “keep value you gain” on previous risky trade and you must not do slow, complicate and highly costly transactions back to your fiat account. You simple exit your risky transaction into BCE.

You can do advanced types “from and to” BCE transactions within the platform itself that make BCE highly useful for everyone who trades with any other cryptocurrencies.

§

Use Case 8: We have own cryptocurrency and looking for implementation of Boat's Coin OMNI wallet

The BCE natively supports multiple wallets creation for all BTC derived blockchains and a few other RPC API. It also has support for HTTP API to power the wallet, e.g., blockcypher.com, blockchain.info, and blocktrail.com. Other API can be easily integrated. All wallets can be used as a payment gateway.

Take care, rare exist stable and quality cryptocurrencies like BCE that can have 1:1 ratio against fiat money. **If you are other marine industry cryptocurrency or any other,**

enough quality cryptocurrency BCE is easy to use as “safe haven” for your cryptocurrency. Using BCE OMNI wallet make possible your own cryptocurrency have instantly more features and increased number of options.

You can do advanced types “from and to” BCE transactions within the platform itself that make BCE highly useful for your own cryptocurrency.

WEBSITES & COMPANIES:

Use Case 9: I want to start my own nautical industry investing system with your agency

Boat's Coin build the white-label software that your company can rebrand easily.

Start your own nautical industry investing system with our yacht charter software is possible for everyone who has a website and registered a company.

All type of companies connected can earn 1% annual interest when they add Boat's Coin platform into own company service.

You can just implement our API and iframe solutions which allow you to load all the data from Boat's Coin central system and build your yacht charter management financing offer in the most comfortable possible way.

Boat's Coin software system enriches your service and makes possible stable long-term commission earning for you.

§

Use Case 10: I want people to easier buy or get discounts on my marine products

It is easy, just inform people through your website about this option and invite them. Your web shop can exchange amount of BCE that buyer has against marine products you sell.

You can easily transfer BCE latter to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

This approach makes your web shop radically more popular and makes it easy to sell products because if you accept BCE, it has similar effects like you give a discount, start exist more buying options, or you can give special discounts and increase sales on that way.

If people that visit your web store still doesn't have BCE, ask them about that and if possible send them your invitation link. Your web store can receive rewards in BCE from all people than you successfully invite too.

You can with accepting BCE make all your products easier to buy, cheaper and increase overall popularity and sale of your web shop on worldwide base.

§

Use Case 11: I am a boat sale company owner, and I wish that people can buy boats easily and cheaper from my website

Whoever sells the boats or a boat owner, knows that any boat is not easy to sell. If your boat sale company and or boat owner accept BCE as part or full value of boat that is on sale, this boat sale will radically easier happen. Just inform people through your website about an option that you accept BCE and invite potential boat buyers. You can exchange amount of BCE that buyer has against boat you sell latter to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

This approach makes your boat offer radically more popular and make it easier to sell on a worldwide base because if you accept BCE, it has similar effects like you give a hidden discount 10-12%! If your buyer makes a previous saving in BCE, he or she has the option to use BCE in the transaction, but still, keep 10-12% reward based on 7 years deal that that person makes in the past with Boat's Coin.

If people who are interested in buying your boat still doesn't have BCE, ask them about that and if possible send them your invitation link that they start to trade with BCE. You can receive rewards in BCE from all people that you successfully invited too.

You radically make your boat sale more attractive and cheaper for people worldwide.

Your boat buyer can through BCE get more affordable your used boat, and you can easily exchange BCE to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

§

Use Case 12: I am a yacht charter company owner and want to rent boats to people more affordable and easier

It is easy; your charter company just need to accept. You exchange amount of BCE from your yacht charter clients. You can transfer the amount of BCE you receive to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

This approach makes all your yacht charter offers radically more popular and makes it easy to sell on a worldwide base because if you accept BCE, it has similar effects like you give a discount and you increase the number of service sale possibilities.

If people who are interested buy your boat still doesn't have BCE, ask them about that and if possible send them your invitation link. You can receive rewards commission in BCE from all people than you successfully invite too.

You can make all your yacht charter sales more attractive and cheaper for people worldwide.

Your yacht charter service buyers can through BCE get more affordable or cheaper services, and you can easily exchange BCE to Bitcoin, ETH, Fiat money, just continue to hold BCE or any other combinations.

§

Use Case 13: I want my yacht charter company can rent boats without required yacht charter refundable deposit complications

Every yacht charter company is aware of usually needed refundable charter deposits. They cover all possible damage to the yacht during your charter.

BSC have timer delay options that can help with any escrow type of situation. So your yacht charter agency can just accept BCE and set 7days delay. If your customer back from bare yacht charter with the whole boat, the system automatically sends BCE back to him. If any damage to the boat happens, a system will release customer damage deposit reserved BCE to your charter company.

Your company easily avoid any complications with credit card companies and other issues with the traditional bareboat charter administration.

Your company can use advances BCE delay escrow features and make your bareboat charter services to your worldwide clients more modern, direct and straightforward.

§

Use Case 14: I wish that my company easily sell products or services to unknown persons

If your company want to sell any products and services to unknown persons, BSC can help you do it more safely.

BSC have timer delay options that can help with any escrow type of situation. So you can just set the delay time in your BCE transaction, and the sends you product or service to the buyer. After buyer receives product or service successfully, BCE will be given to the seller. If any problem with the delivery happens, and your company is entirely correct in terms, you can get BCE funds directly without waiting for buyer's approval. Or if you wish, an escrow agent can be readily added to the transaction as independent negotiation 3rd party site.

Additional one advanced BCE crypto value option is a messaging system. If you use BCE messaging option, you can make easier your cryptocurrency transactions, because this type of operation is not happening in just one and immediate step. If you need and wish, you can make complex deals in a safe way for both sides buyer and seller.

You can do any transactions with unknown people on the radically safer way using BCE advanced features.

BCE Technical Solution on Top of Ethereum Blockchain Description

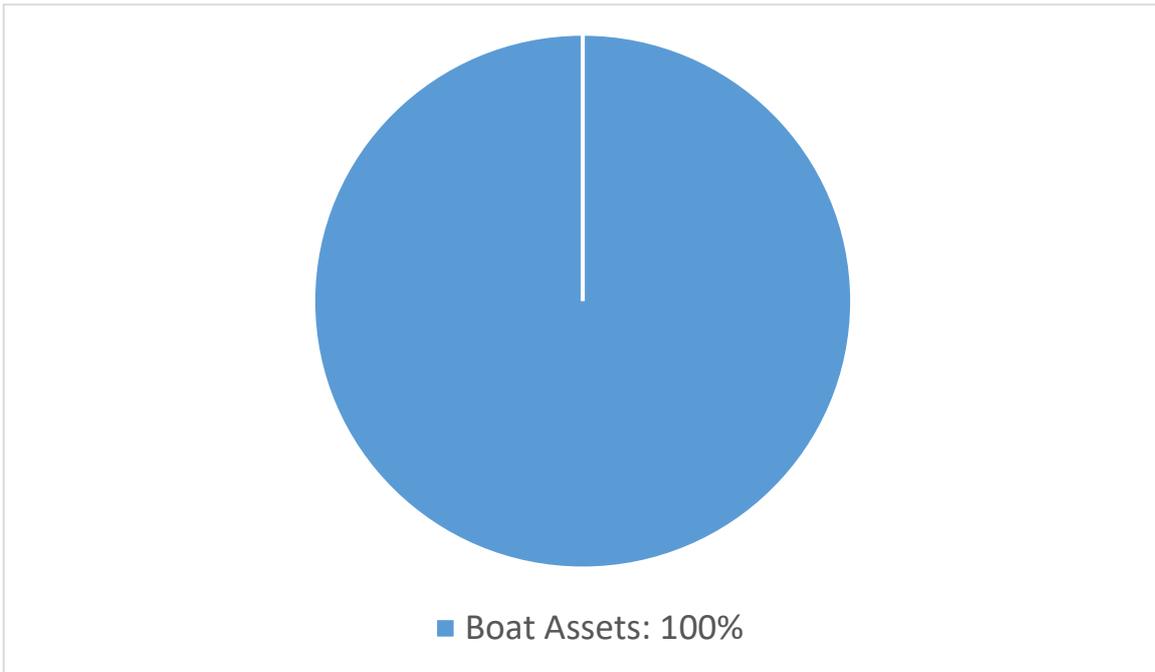

BCE Distribution of Funds

We are design system that can work in many cases, as an example:

1. In "worst case" scenario that Boat's Coin EUR (BCE) ICO fails, BCE still can start with traditional part of the system.
2. The Boat's Coin EUR budget outlined below define exact budget allocation ratios and is not directly affected by the amount of funds raised from the ICO! Because that we can have so high difference between softcap and hardcap amounts. If Boat's Coin ICO more succeeds, we can help process and reserve more new boats in advance. This makes for us possible open more blockchains for public sale at the same time and starts on a larger scale. On another side, if we just reach presale minimum, we are still entirely operational, but we start with a smaller number of boats and blockchain nodes.

BCE Blockchain Allocation Overview

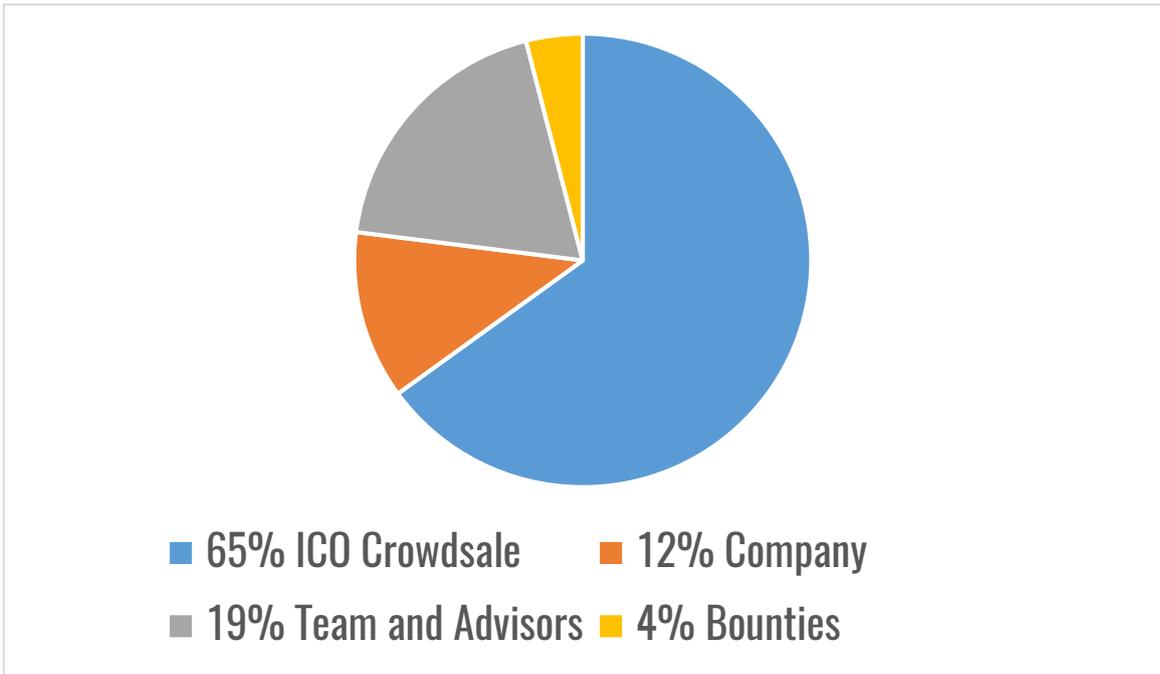

Boat as tangible asset 100% backed behind every issued blockchain.

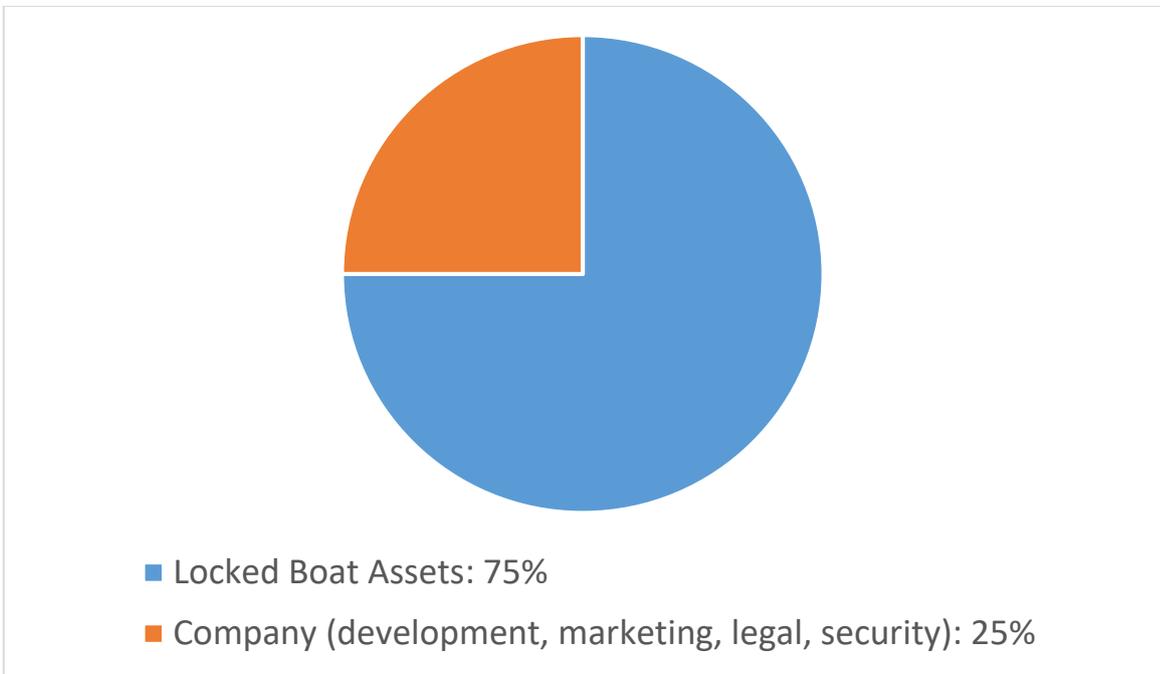

BCE Distribution of ICO Funds

Token Distribution Overview

A total of 65% of available tokens will be accessible to buyers through the ICO and will be used for buying boats. If ICO doesn't succeed to fundraise softcap, funds will be returned to ICO investors.

BCE Corporate Funds Allocation After ICO

Conclusion

Boat's Coin creates the first boat assets backed cryptocurrency in the world.

Boat's Coin EUR are fully reserved in a one-to-one ratio with tangible boat assets, entirely independent of liquidity constraints and able guaranteed fixed annual rewards to BCE holders through smart contracts. The complete system is able without any issues to stay in fixed 1:1 ratio against EUR fiat currency.

Our plans for future is to include USD, GBP, and JPY fiat value options.

Boat's Coin has a simple and straightforward Proof of Boat Asset Reserves and Real-Time Transparency through the whole BCE lifetime cycle maintained by public Boat's Coin Transparency Page.

A crypto token backed by real assets provides individuals and organizations with a decentralized and innovative method of managing value while using traditional and proven tangible boat assets behind the system.

BCE asset-backed token offers participants advantage of blockchain technology with less volatile currency and predicted annual rewards.

6. BOAT'S COIN FUNDING PROCESS

We have developed a financing plan which is a combination of traditional financing through buying our USA corporation shares (equity crowdfunding) with a modern Initial Coin Offering (ICO) way of blockchain technology way of funding realized through our Estonia EU based office.

This funding process fully covers all legal aspects for all citizens of the world.

It is essential for investors to understand the whole Boat's Coin funding process and just focus on parts that are entirely legal in your country.

Equity Crowdfunding Investors

Boat's Coin Group Inc.

USA C Corporation

Boat's Coin Group USA based corporation offers shares through equity crowdfunding based on the United States Regulation Crowdfunding and Regulation A+

In the USA under the Securities Act of 1933, offer to sell securities must either be registered with the United States Securities and Exchange Commission (SEC) or meet specific qualifications to exempt them. Regulation A (or Reg A) contains rules providing exemptions from the registration requirements, allowing companies to use equity crowdfunding to offer and sell securities without having to register the securities with the SEC. The regulation can be found under Title 17 of the Code of Federal Regulations, chapter 2, part 230. The legal citation is 17 C.F.R. §230.251 et seq.

This offer is great for citizens of the United States and other countries where local law doesn't allow funding through initial coin offering (ICO) or exist law limitations.

This offer is at the same time for investors who prefer the traditional way of investing and personally don't like funding through initial coin offering (ICO) technology.

Boat's Coin Group Inc. is 100% owner of Estonian headquarters office Boat's Coin OU.

Initial Coin Offering Investors

Boat' s Coin OU

Estonian headquarters

Boat' s Coin Estonia based corporation makes initial coin offering (ICO)

On 4th April 2016 in case number 3-3-1-75-15, the Estonian Supreme Court ruled that the exchange of cryptocurrency is a lawful business activity regulated by the Anti-Money Laundering Act and Terrorism Finance Act.

Estonian law completely regulates and recognize token as a "certificate that expresses any currency or right in the blockchain."

Virtual currency means a value represented in the digital form, which is digitally transferable, preservable or tradable and which natural persons or legal persons accept as a payment instrument, but that is not the legal tender of any country or funds for Article 4(25) of Directive (EU) 2015/2366 of the European Parliament and of the Council on payment services in the internal market, amending Directives 2002/65/EC, 2009/110/EC and 2013/36/EU and Regulation (EU) No 1093/2010, and repealing Directive 2007/64/EC (OJ L 337, 23.12.2015, pp. 35–127) or a payment transaction for the purposes of points (k) and (l) of Article 3 of the same Directive.

A clear definition of cryptocurrencies ("virtual currencies") and government regulation of the cryptocurrency wallets are significant advantages of Estonian corporate law for Boat's Coin blockchain project and one of the leading reason to select Estonia as our headquarters office.

This offer is great for citizens of the countries where local law allows funding through initial coin offering (ICO).

7. ROADMAP

Q4 2017: Boat's Coin MVP finalization

Boat's Coin decentralized yacht charter and boat leasing investing platform minimum viable product (MVP) is successfully developed.

Q1 2018 Groundwork Preparation for ICO

Complete groundwork preparation for ICO on all project levels

Q2 2018 ICO Pre-Sale Start

ICO Pre-Sale have \$1.000.000 cap

We wish increase trust in our initial investors and don't charge them any in advance. Escrow service will be used. The pre-ICO deal is simple: In a moment we register Estonia headquarters office and open a corporate bank account, we get pre-ICO money.

Q3 2018 Official Boat's Coin EUR (BCE) ICO crowd sale start

ICO crowd sale soft cap/minimum goal: \$3 million

ICO crowd sale hard cap/maximum goal: \$30 million

Q3 2018 Equity crowdfunding based on the United States Regulation Crowdfunding start

Equity crowdfunding based on the United States Regulation Crowdfunding start have \$1.000.000 cap

Boat's Coin for process use licensed crowdfunding service which connects startups with investors online and uses a provision in the 2012 JOBS Act which allows unaccredited investors to provide equity for entrepreneurial undertakings.

Q4 2018 Completing Boat's Coin EUR (BCE) platform development and project launching

Our developers are fully completing and test Boat's Coin EUR platform development. We are ready to launch the BCE project.

Q1 2019 Equity crowdfunding based on the United States Regulation A+ start

Equity crowdfunding based on the United States Regulation A+ have \$50.000.000 cap

Boat's Coin for process use licensed crowdfunding service which connects startups with investors online and uses a provision in the 2012 JOBS Act, this allows unaccredited investors to provide equity for entrepreneurial undertakings.

More to come

Expect more features, Boat's Coin in other currencies, and global expansion.
